

INTERNATIONAL CERTIFICATION SERVICES

INSPECTION, VERIFICATION AND CERTIFICATION

Indeed globalization has brought the world together that has shrunk the world boundaries between the countries. This has given an excellent opportunity to the developing countries as well as developed countries. Fast changing technology, socio-economic system and increased customer awareness about quality has forced the manufacturer to produce cost economic and quality product and services to survive in highly competitive domestic and international market.

International Certification Services is committed to provide necessary support to industry and organization in achieving their goals towards : "Excellence in Quality" and "Continual Improvement".

International Certification Services follows systematic approach to achieve the above goals and covers wide spectrum of industries for onland, offshore and marine industry sectors.

International Certification Services ensures improvement of quality, minimization of loss and damage to life, property and environment to the public, government and industry. We have well established quality assurance system, competent, well qualified and highly experienced personnel in various technology and management systems.
